CAREER OBJECTIVE

Undergraduate Computer Science and Engineering student skilled in HTML, CSS, JavaScript, React.js, Node.js, Express.js, FastAPI, REST APIs, MongoDB, PostgreSQL, and Python. Passionate about building responsive web applications and scalable software solutions, with a strong interest in Artificial Intelligence, Machine Learning, and applying AI to solve real-world problems.

EDUCATION

Vignan's Institute of Information Technology (VIIT) 2023–2027
Bachelor of Technology in Computer Science and Engineering CGPA: 9.24

EXPERIENCE

AI–Machine Learning Intern — Council for Skills and Competencies (CSC India) May 2026 – Jun 2026

- Completed an AI–Machine Learning internship to gain practical experience in machine learning concepts and data-driven problem solving.
- Applied Python, data preprocessing, exploratory data analysis, and supervised learning techniques to build and evaluate predictive machine learning models.
- Strengthened practical AI/ML skills by understanding the end-to-end machine learning workflow, from data preparation to model evaluation.

Web Development Intern — ApexPlanet Jun 2026 – Jul 2026

- Developed 5 hands-on web development projects, including a Landing Page, To-Do List, Recipe Website, News App using News API, and Event Manager.
- Built responsive, interactive, and user-friendly web interfaces to strengthen front-end development skills.
- Integrated REST APIs to fetch and display real-time data, implementing dynamic and interactive application features.

PROJECTS

RailwayGo – Railway Exit Navigation System Mar–May 2025

- Developed a web application that helps passengers find the nearest railway station exits using interactive station maps and directional guidance.
- Built a responsive and user-friendly interface to improve accessibility and simplify station navigation, providing a seamless navigation experience.
- **Technologies used:** HTML, CSS, JavaScript.

AI-Powered Stock Market Intelligence & Quantitative Research Terminal July-Aug 2026

- Developed an end-to-end stock market intelligence platform using Machine Learning (Random Forest, XGBoost) and Deep Learning (LSTM, GRU, Transformer) models to predict 5-day stock price movements.
- Built a FastAPI-based backend with automated market data ingestion, technical indicators, financial news sentiment analysis, SHAP explainability, and an interactive dashboard for stock visualization.
- **Technologies used:** Python, FastAPI, Pandas, NumPy, Scikit-learn, PyTorch, XGBoost, SHAP, Chart.js, HTML, CSS, JavaScript, Docker, MongoDB, PostgreSQL.

Technical Skills

Programming Languages: Python, Java, C, JavaScript

Web Development: HTML, CSS, JavaScript, React.js, Node.js, Express.js, FastAPI, REST APIs, Chart.js

Databases: MongoDB, PostgreSQL

AI & Machine Learning: Machine Learning, Deep Learning, Natural Language Processing (NLP), Scikit-learn, TensorFlow/Keras, LLMs, RAG, Model Training, Model Evaluation

Core CS Fundamentals: Data Structures and Algorithms (DSA), Database Management Systems (DBMS), Operating Systems (OS), Computer Networks (CN)

Tools & Deployment: Git, GitHub, VS Code, Jupyter Notebook, Google Colab, Docker, Vercel, Render

CERTIFICATIONS

- **Cisco Networking Academy** – HTML Essentials, CSS Essentials, JavaScript Essentials 2, Python Essentials
- **SoloLearn** – Python Fundamentals, Web Development
- **EY & Microsoft** – AI Skills Passport
- **Coursera** – Artificial Intelligence Essentials V2
- **EduSkills** – Web Development Internship
- **ApexPlanet Pvt. Ltd.** – 45-Day Web Development Internship
- **Council for Skills and Competencies (CSC India)** – AI & Machine Learning Internship (APSCHE)

ACHIEVEMENTS

- Solved 286 coding problems on LeetCode.
- School-level achievements in Drawing.
