

HUMAN RESOURCES & PROJECT MANAGEMENT

UNIT –I: HRM: Nature, Scope, Concept of HRM, Functions of HRM, Role of HR manager, emerging trends in HRM, E-HRM, HR audit models, ethical aspects of HRM. HR Planning, Demand and Supply forecasting of HR, Job Design, Recruitment, Sources of recruitment, Selection- Selection Procedure.

1. HRM: Nature, Scope, Concept

HR (Human Resources): refers to the department or team responsible for managing an organization's personnel, including hiring, payroll, compliance, and employee support.

Human Resource Management can be defined as

Planning, Organizing, Directing, Controlling of Procurement, Development, Compensation, Integration, Maintenance and Separation of Human Resources - to attain individual, organizational and social objectives are achieved.

Concept of HRM

Human Resource Management (HRM) is the **strategic approach** to acquiring, developing, motivating, and retaining employees to achieve organizational goals.

Nature of HRM

- **People-focused:** Centers on managing human capital
- **Strategic:** Aligns workforce with business objectives
- **Continuous:** Ongoing process, not one-time activity
- **Interdisciplinary:** Draws from psychology, sociology, economics

- **Universal:** Applied in all organizations regardless of size/type

Scope of HRM

Covers all major activities in a worker's working life—from entry to exit:

- Personnel aspect (manpower planning, recruitment, selection, training)
- Welfare aspect (employee maintenance, safety, health)
- Industrial relations aspect (union relations, grievance handling)

OBJECTIVES OF HRM:

1. HRM Objectives

These are the core objectives of HRM:

- Effective utilization of human resources.
- Developing employee skills and competencies.

- Maintaining employee satisfaction and motivation.
- Ensuring the right person is placed in the right job.

2. Personal Objectives

These focus on fulfilling employee needs:

- Career growth and development.
- Job satisfaction.
- Fair compensation and benefits.
- Work-life balance and employee well-being.

3. Functional Objectives

These ensure the HR department operates efficiently:

- Proper staffing and workforce planning.
- Effective recruitment and selection.
- Training and development programs.
- Performance management and employee relations.

4. Organizational Objectives

These support the achievement of organizational goals:

- Improved productivity and performance.
- Competitive advantage through skilled employees.
- Organizational growth and profitability.
- Effective management of human capital.

5. Societal Objectives

These represent the broader responsibility of HRM toward society:

- Compliance with labor laws and ethical practices.
- Promoting equal employment opportunities.
- Supporting environmental and social responsibility initiatives.
- Contributing to community development and social welfare.

HRM aims to balance the needs of employees (personal objectives), HR functions (functional objectives), organizational goals (organizational objectives), and societal expectations (societal objectives), ultimately ensuring effective management of human resources.

2. Functions of HRM

Function	Description
1. Recruitment/Talent Acquisition	Finding & hiring qualified candidates
2. Talent Engagement	Retaining & motivating employees
3. Business Partnership	Aligning HR with strategy
4. Learning & Development	Training & skill enhancement
5. Performance Management	Evaluating & improving performance
6. Compensation & Benefits	Salary, incentives, benefits
7. Documentation	Personnel filing & records
8. Disciplinary Committee	Handling violations
9. Policy-making	Creating & communicating policies
10. Risk Management	Compliance & labor law adherence

3. Role of HR Manager

HR managers **plan, direct, and coordinate** administrative functions:

- Consulting with leadership on workforce strategies
- Leading recruitment, interviewing, and hiring
- Administering compensation and benefits
- Managing employee relations & conflict resolution
- Ensuring compliance with employment laws
- Promoting organizational culture & employee engagement
- Advocating for employees while supporting business needs

ROLES AND RESPONSIBILITIES OF AN HR MANAGER

4. Emerging Trends in HRM

Key trends transforming HRM:

Trend	Impact
Artificial Intelligence (AI)	Automates recruitment and performance tracking
Remote Employees & Virtual Teams	Requires digital collaboration tools
Automation	Streamlines HR processes

Trend	Impact
Data-Driven Strategies	Analytics for decision-making
Workforce Diversity	Inclusive hiring practices
Employee Expectations	Focus on work-life balance, flexibility
Corporate Downsizing	Strategic workforce reduction
Contingent Workforce	Freelancers, contractors
Health & Well-being	Mental health, caregiving benefits
Mobile/Open Workforce	Flexible work arrangements

5. E-HRM (Electronic HRM)

E-HRM uses **technology/digital platforms** to deliver HR functions:

- Online recruitment & applicant tracking
- Self-service portals for employees
- Digital training platforms (e-learning)
- Automated performance management
- Cloud-based HR information systems
- Benefits: Cost reduction, efficiency, better data access

6. HR Audit Models

HR audit evaluates HR effectiveness. Common models:

- Compliance Audit: Checks legal/regulatory adherence
- Performance Audit: Measures HR metrics (turnover, productivity)
- Strategic Audit: Aligns HR with business strategy
- Best Practices Audit: compares against industry standards
- Function-Specific Audit: Recruitment, training, compensation focus

7. Ethical Aspects of HRM

Key ethical considerations:

- Fair recruitment: No discrimination based on gender, race, age
- Privacy: Protecting employee data
- Equitable compensation: Pay transparency, no wage gaps
- Safe workplace: Health & safety standards
- Whistleblower protection: Reporting mechanisms
- Transparent promotions: Objective criteria
- Confidentiality: Maintaining employee confidentiality

8. HR Planning

Human Resource Planning ensures optimal workforce for organizational needs:

- Analyzing current workforce
- Forecasting future needs (demand & supply)
- Identifying gaps
- Developing action plans (recruitment, training, retention)

Demand Forecasting

Estimates future HR needs using:

- **Trend analysis:** Historical data patterns
- **Managerial judgment:** Expert opinions
- **Workload analysis:** Based on production targets
- **Ratio analysis:** Output-per-worker ratios

Supply Forecasting

Assesses available HR through:

- **Skills inventories:** Employee capability databases

- **Markov analysis:** Internal movement patterns
- **Replacement charts:** Identifying successors
- **External labor market analysis**

9. Job Design

Job Design structures work tasks and responsibilities:

- **Methods:** Job simplification, specialization, rotation, enrichment, empowerment
- **Goals:** Improve productivity, motivation, satisfaction
- **Factors:** Worker capabilities, technology, organizational needs
- **Modern approach:** Flexible roles, cross-functional teams

10. Recruitment

Recruitment in Human Resource Management (HRM) is the systematic process of identifying, attracting, screening, shortlisting, and hiring qualified candidates for open positions within an organisation. Its primary goal is to build an organisation's human capital by ensuring the right people with the right skills are placed in the right roles.

Recruitment Process

Recruitment = Process of attracting qualified candidates

11. Selection & Selection Procedure

Selection = Choosing the best candidate from applicants

Selection Procedure :

1. **Initial Screening:** Resume review, basic eligibility
2. **Application Form:** Detailed personal/professional data
3. **Employment Tests:** Skills, aptitude, personality tests
4. **Interviews:** Structured/unstructured, panel/single
5. **Reference Checks:** Verifying past performance
6. **Medical Examination:** Health fitness check
7. **Job Offer:** Formal appointment letter

Selection is the process of choosing the most suitable candidate from the pool of applicants for a particular job. It aims to identify individuals whose qualifications, skills, experience, and personality best match the requirements of the organization.

The selection procedure generally begins with initial screening, where resumes are reviewed to ensure that candidates meet the basic eligibility criteria. Shortlisted candidates are then required to complete an application form that provides detailed personal, educational, and professional information. Next, employment tests such as aptitude, skill, intelligence, and personality assessments may be conducted to evaluate the candidate's suitability for the role. Candidates who perform well are invited for interviews, which may be structured or unstructured and conducted by a single interviewer or a panel. Following the interview, reference checks are carried out to verify the candidate's previous work performance, qualifications, and conduct. A medical examination may then be conducted to assess the candidate's physical fitness for the job. Finally, successful candidates receive a job offer in the form of a formal appointment letter, confirming their selection and terms of employment.

UNIT –II: HRD, HR accounting, Models, Concept of Training and Development, Methods of Training. Performance Appraisal: Importance Methods of performance appraisal, Career Development and Counseling, group interaction.

1. HRD (Human Resource Development)

Human Resource Development (HRD) is the framework used to help employees develop their personal and organizational skills, knowledge, and abilities. It is the growth-oriented side of HR—focusing on long-term employee potential and continuous learning rather than just day-to-day administrative tasks like payroll and compliance.

Concept of HRD

HRD is a process of **systematically developing** employees' skills, knowledge, and attitudes to help them perform roles effectively and grow professionally.

Key characteristics:

- Systematic, planned activities to improve employee capabilities
- Develops competencies, motivation, and culture of continuous learning
- Long-term, proactive, developmental focus

Difference: HRM vs HRD

HRM	HRD
Administrative focus	Developmental focus
Short-term orientation	Long-term orientation
Reactive approach	Proactive approach
Controlled by HR department	Shared responsibility
Maintains workforce	Develops workforce

Components of HRD:

1. Training and Development
2. Performance Appraisal
3. Career Planning
4. Organizational Development (OD)
5. Counseling and Coaching

Evolution of HRD:

- **1970s:** Concept introduced by Leonard Nadler
- **1990s-Present:** Strategic, technology-driven, performance-oriented
- Shifted from administrative HR to developmental HR

Need & Significance:

- Cope with rapid organizational change
- Enhance productivity and morale
- Prepare future leaders
- Align employee goals with organizational strategy

2. HR Accounting

HR Accounting = Assigning **monetary value** to human resources

Key Concepts:

- Measures cost and value of human capital
- Tracks HR investments (training, recruitment costs)
- Calculates ROI on employee development
- Includes:
 - **Historical cost method:** Recruitment + training costs
 - **Replacement cost method:** Cost to replace employees
 - **Opportunity cost method:** Value of best alternative use

Benefits:

- Better decision-making on HR investments
- Transparent valuation of workforce
- Supports strategic planning

3. HRD Models

Key HRD Models:

Model	Description
ADDIE Model	Analysis, Design, Development, Implementation, Evaluation
Kirkpatrick's Model	Evaluates training at 4 levels: Reaction, Learning, Behavior, Results

Model	Description
Instructional Design Model	Systematic curriculum development
Transactional Analysis (TA)	Ego states: Parent, Adult, Child
Behavior Modeling	Learning by observation and imitation
Kurt Lewin's OD Model	Unfreeze → Change → Refreeze

4. Concept of Training and Development

Training and Development (T&D) programs are strategic initiatives designed to enhance an employee's knowledge, skills, and overall performance. While training focuses on immediate, job-specific skills for current roles, development is a long-term educational process designed to prepare workers for future responsibilities and career growth.

- Training is the process of teaching new skills or abilities to employees to help support the company's goal.
- Development is the process of improving the existing skills and abilities of employees to better fit the company's needs.

TRAINING VS DEVELOPMENT

ASPECT	TRAINING	DEVELOPMENT
 DEFINITION	Instruction to improve knowledge, skills, and abilities for the current job	Systems designed to grow the employee beyond their current job
 ORIENTATION	Job-oriented	Career-oriented
 INTENT	Help people do their job better right now	Help people grow beyond their current job
 FOCUS	Skills and "doing"	Behaviors, mindsets, and "being"
 DURATION	Short-term (days, weeks, months)	Long-term (years, continuous)
 SCOPE	Narrow – specific job tasks	Broad – systems, processes, overall growth
 SKILLS TAUGHT	Technical skills	Technical + human + conceptual skills
 SUITABILITY	Technical/non-managerial staff	Managerial staff
 INITIATIVE	Employer-driven (external control)	Individual-driven (internal control)
 PURPOSE	Increase productivity & capability	Increase leadership & managerial capability

Training

- **Job-specific:** Focuses on current job skills
- **Short-term:** Immediate performance improvement
- **Technical skills:** Operations, procedures, tools

Development

- **Future-oriented:** Prepares for future roles
- **Long-term:** Career growth focus
- **Soft skills:** Leadership, communication, management

Importance:

- Improves individual and group performance
- Reduces errors and accidents
- Increases employee satisfaction
- Enhances organizational competitiveness
- Bridges skill gaps

Training Needs Assessment (TNA):

1. **Organizational analysis:** Where is training needed?
2. **Task analysis:** What skills are required?
3. **Individual analysis:** Who needs training?

5. Methods of Training

A. Training Within Industry (TWI)

1. On-the-Job Training (OJT)

- Learns while working
- **Methods:**
 - Coaching/Mentoring
 - Job rotation
 - Apprenticeship
 - Understudy method

Advantages: Practical, cost-effective, immediate application

2. Off-the-Job Training

- Conducted away from workplace
- **Methods:**
 - Classroom lectures
 - Workshops
 - Seminars
 - External courses

Advantages: Focused learning, no work distractions

B. Management Development Methods:

Method	Description
Case Study	Analyze real business situations
Role Play	Practice scenarios in simulated environment
Lecture	Traditional classroom teaching
Vestibule Training	Mock workplace simulation

Method	Description
In-basket Exercise	Handle simulated documents/decisions
Simulation	Computer-based realistic scenarios
Management Games	Team-based business competitions
Programmed Instruction	Self-paced learning modules
Sensitivity Training	Develop empathy & interpersonal skills
Transaction Analysis	Understand ego states in interactions

C. Modern Training Methods:

- **E-learning**: Online platforms, virtual classrooms
- **Virtual Reality (VR)**: Immersive simulations
- **Mobile Learning**: App-based training
- **Blended Learning**: Mix of online + offline

6. Performance Appraisal

Definition

A performance appraisal is a structured, periodic evaluation process used to assess an employee's job performance and contribution to organizational goals. It systematically evaluates employee performance and understands abilities for further growth.

Concept

Performance appraisal = Systematic evaluation of employee job performance and potential

Importance:

Benefit	Purpose
Feedback	Employees know strengths/weaknesses
Decision-making	Guides promotions, transfers, terminations
Compensation	Basis for salary increases, bonuses
Training needs	Identifies skill gaps
Career planning	Supports development paths
Motivation	Encourages better performance
Legal compliance	Documented performance records

Methods of Performance Appraisal:

Traditional Methods:

Method	Description
Ranking Method	Employees ranked from best to worst
Grading Method	Predefined categories (A, B, C)
Checklist Method	Yes/No questions about behaviors
Essay Method	Written narrative description

Method	Description
Critical Incident	Records specific positive/negative behaviors
Field Review	HR manager evaluates with supervisor

Modern Methods:

Method	Description
Behaviorally Anchored Rating Scale (BARS)	Specific behavioral examples for ratings
Management by Objectives (MBO)	Goal-based evaluation
Performance Standard Appraisal	Pre-set standards measured
Psychological Appraisal	Psychologist evaluates potential
Human Resource Accounting	Cost-benefit of employee
Assessment Centre	Simulations, tasks to evaluate potential
Annual Review System	Yearly formal evaluation

Contemporary Method:

Method	Description
360° Feedback	Multiple raters: self, supervisor, peers, customers, subordinates

Advantages: Comprehensive, reduces bias

Limitations: Time-consuming, complex

7. Career Development and Counselling

Career Development:

- **Process:** Planning and managing career progression
- **Components:**
 - Career planning (individual identifies goals)
 - Career pathing (organisational pathways)
 - Career counselling (guidance)
 - Mentoring (experienced guides fresh employees)

Career Development Process:

1. Self-assessment (skills, interests)
2. Goal setting
3. Skill development
4. Implementation
5. Review and adjustment

Counseling:

- **Purpose:** Help employees resolve personal/work issues
- **Types:**
 - **Appraisal counseling:** Performance feedback
 - **Problem-solving counseling:** Address issues
 - **Developmental counseling:** Career growth guidance

Coaching & Mentoring:

- **Coaching:** Short-term, skill-specific, performance-focused
- **Mentoring:** Long-term, relationship-based, career-focused
- Both provide guidance, feedback, and support

Performance Appraisal Methods

8. Group Interaction

Concept

Group interaction = **Communication and exchange** among group members to achieve common goals

Purpose in HRD:

- Team building
- Problem-solving
- Decision-making
- Knowledge sharing
- Conflict resolution

Types of Group Interactions:

Type	Description
Formal Groups	Officially organized (departments, teams)
Informal Groups	Social networks, friendships
Task Groups	Project-based teams
Committee Groups	Standing committees

Group Interaction Techniques:

1. **Brainstorming:** Free idea generation
2. **Syndicate Groups:** Small groups discuss specific topics
3. **Group Discussion:** Structured conversation
4. **Role Playing:** Practice scenarios in groups
5. **Buzz Sessions:** Quick small-group discussions
6. **Team Building Activities:** Collaborative exercises

Benefits:

- Enhances collaboration
- Improves communication skills
- Builds trust among members
- Develops leadership abilities
- Facilitates organizational development

Summary Table: HRD Interventions

Intervention	Purpose
Performance Appraisal	Evaluate current performance
Potential Appraisal	Assess future capabilities
Coaching & Feedback	Improve skills through guidance
Career Planning	Map career progression
Training	Develop job-specific skills
Systems Development	Improve organizational processes

Human Resource Development (HRD) interventions are systematic activities designed to enhance employee performance, potential, and organisational effectiveness. Performance Appraisal evaluates an employee's current job performance and identifies areas for improvement, while Potential Appraisal assesses an employee's future capabilities and suitability for higher responsibilities. Coaching and Feedback provide continuous guidance and constructive suggestions to improve skills, knowledge, and overall performance. Career Planning helps employees identify career goals and chart

a path for professional growth within the organisation. Training focuses on developing job-specific skills and competencies required for effective performance. Systems Development aims to improve organisational processes, structures, and work systems, thereby increasing efficiency and productivity. Together, these interventions contribute to individual development and organisational success.

HRD interventions focus on improving employee performance, developing future potential, supporting career growth, enhancing skills, and strengthening organisational systems.

UNIT –III: Basics of Project Management, Concept, resource management, Project environment, Types of Projects, project networks-DPR, Project life cycle (Half unit)

Basics of Project Management:

Project Management is a structured approach to organizing, carrying out, overseeing, and managing projects to accomplish particular objectives within predetermined parameters. It includes a wide range of approaches, instruments, and strategies meant to efficiently manage activities, resources, and deadlines to provide results that satisfy stakeholders.

- Project management is essentially setting goals, making thorough plans, assigning resources, controlling risks, and making sure work is completed on schedule and up to quality standards.
- Strong problem-solving, communication, and leadership abilities are needed to overcome obstacles and maintain the project's direction.
- Project management provides an organized framework for promoting success in a variety of situations and industries, from the start of a project with well-defined goals and scopes until its completion with thorough assessments.

What is Program Management

Program management refers to the coordinated management of multiple related projects to achieve broader strategic objectives. While projects focus on delivering specific outputs, programs focus on achieving long-term organizational benefits and strategic goals.

Program managers are responsible for:

- Managing relationships between multiple projects
- Aligning projects with organizational strategy
- Managing shared resources
- Monitoring risks and dependencies across projects

By coordinating several related projects, program management helps organizations maximize efficiency, improve collaboration, and achieve transformational outcomes.

Why do we Need Project Management

Project management plays an essential role in ensuring that projects are completed successfully and efficiently.

- **Clarity of Objectives:** Project management helps define and document clear goals, reducing misunderstandings and ensuring that all team members work toward a common objective.
- **Timely Delivery:** Through structured planning and monitoring, project management helps ensure that projects are completed within the planned schedule.
- **Stakeholder Satisfaction:** By engaging stakeholders throughout the project lifecycle, project management ensures that expectations are understood and met, leading to higher satisfaction.

- **Optimized Resource Utilization:** Project management enables efficient allocation and utilization of resources such as time, budget, and personnel, reducing waste and improving productivity.

- Project management principles are the fundamental rules and guidelines that ensure projects are executed efficiently and achieve their intended goals.
- These core concepts, such as maintaining clear roles and focusing on value, provide a consistent framework for teams across different industries.
- Adhering to these best practices improves project success rates and fosters a culture of accountability and continuous improvement.
- Review your current project management practices against these core principles to identify areas where your team can improve its performance.

Effective project management is the backbone of every successful organization. Behind every major business initiative lies a series of projects that drive progress and deliver value.
